

5 . SPECIAL-WINCHES

We are capable of producing winches by your specifications. Sometimes based on our standard program with different specifications, or constructing a completely new special winch. Also winches with completely different drives, like for instance open spur-gear or oil-bath enclosed spur-gear units. For winches which are hand driven we have a different chapter / book because of there special features, ask us if you are interested.

For any kind of special, we like to point out that there are examples in the photo-show on our web-site on the internet (www.lemans-nederland.eu).

Listed below you will find a summary of already by us supplied winches:

- Measuring winches met the unique freewheel system.
